SUMMARY

Frontend developer specializing in React, Next.js and TypeScript. Hands-on experience with state management, REST and GraphQL API integration, server-side rendering, real-time features and testing. Focused on maintainable architecture, performance and reusable components

PROJECT EXPERIENCE

Social Networking Web App Ictroot.uk — team project, IT-Incubator — 2025-2026

Next.js 15, React 19, TypeScript, FSD, RTK Query, React Hook Form, Zod, Vitest, MSW, Playwright

- Performance and **SSR/ISR**: image optimization (**LCP, CLS**), fonts via **next/font**, route-based code splitting, an image fallback with telemetry; stabilization of **SSR/ISR** for the home, profile and post modal pages.
- Messenger: real **API** data, a persistent **WebSocket** channel, voice messages (**recording**, **waveform**), **cursor pagination** with list virtualization, unread and delivery-status indicators.
- Authentication: token refresh with proper error handling, forced logout, guards for guest and protected routes.
- Subscriptions and social features: subscription **API** layer and auto-renew queue, likes, comments, **WebSocket** notifications, state synchronization through the **RTK Query** cache.
- Quality: **Vitest, MSW** and **Playwright** tests, **CI** quality gates, **pull requests** and code review.

Admin Panel — for Ictroot.uk, team project, IT-Incubator, admin.ictroot.uk — 2025-2026

- Set up the project from scratch: App Router structure, **UI kit, ESLint, Prettier, Stylelint, Husky.**
- Added CI quality gates and deployment configs (container, nginx, pipeline).
- Built a typed **GraphQL** layer (**Apollo Client,** type generation) and moderation flows (ban, unban, delete).
- Implemented session-based authentication (**Zustand**) and a posts list with search, infinite scroll and realtime updates.

EDUCATION

Frontend Development — **2023–2026**
IT-Incubator
Project-based training and team development

Software Engineering — **2021–2022**
Zero To Mastery Academy, Udemy
Advanced JavaScript

Self-study
Python, JS, HTML, — **2019–present**

TECHNICAL SKILLS

- **JavaScript, TypeScript, React, Next.js (App Router, SSR/ISR)**
- **Redux Toolkit, RTK Query, Zustand, REST API, GraphQL (Apollo Client), WebSocket**
- **React Hook Form, Zod, Vitest, MSW, Playwright**
- **Sass/SCSS, CSS Modules, Tailwind, Radix UI, Storybook, Feature-Sliced Design (FSD)**
- **Git, GitHub Actions, pnpm, ESLint, Prettier, Stylelint, Husky, Figma, Jira, Vercel**
